

# CASE ACCESS

ACCESS CASE CONCEPT: INSTALL CASE NOW, SCREEN LATER

- The Access Case has been re-engineered to enable even larger sizes, up to a 16' wide image area, while the case is less than 7" (18 cm) tall. It includes a redesigned bottom hinge for ease of access and installation. It also includes removable hoisting brackets to assist in easy lifting during installation.

Case installation during construction keeps screen safe until construction tasks finished, then install screen with easy preset latching brackets.

## FEATURES

- A Draper innovation, the essence of the Access concept is a ceiling recessed headbox designed to be installed during construction of the facility (excluding XL models).
- You can install the case during the "dirty" phase of the construction process and keep the screen safe until you install the projector.
- The screen (motor-in-roller and attached viewing surface) is installed with latching brackets.
- Redesigned bottom closure panel with new hinge system allows the closure panel to hang in place when opened, or it can be easily removed.
- Adjustable or removable hoisting brackets are now included to allow for easy lifting during installation.

- Redesigned bottom closure panel with new hinge system allows the closure panel to hang in place when opened, or it can be easily removed.
- Adjustable or removable hoisting brackets are now included to allow for easy lifting during installation
- White case standard, black available upon request.
- WARRANTY: One year against defects in materials and workmanship.
