

Motorized Exterior FlexShade

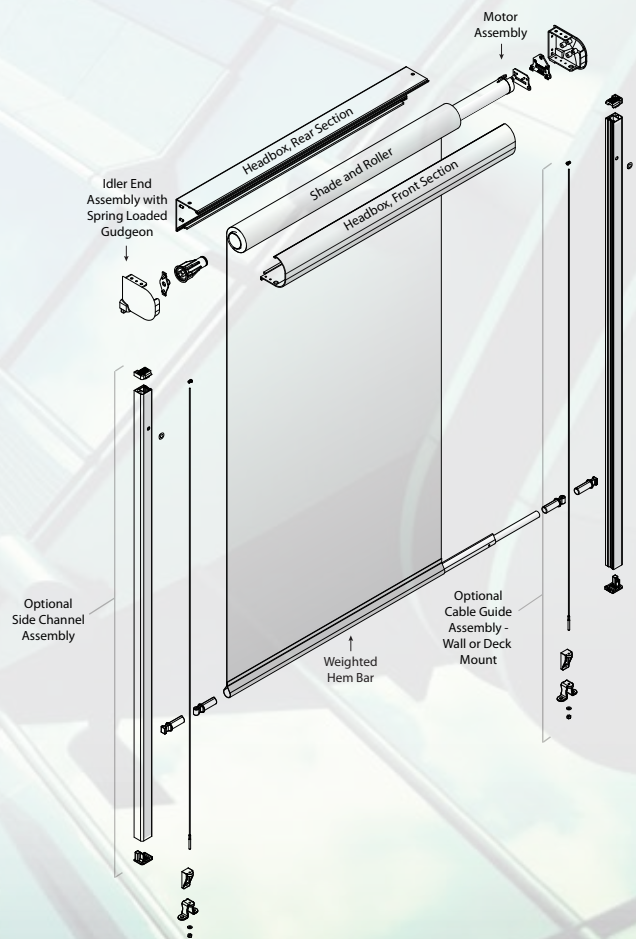

Outdoor Solar Control at the Touch of a Button

For the ultimate in solar control and convenience choose Draper Motorized Exterior FlexShades. Easily raise or lower shades with the touch of a wall switch or remote. Motorized Exterior FlexShades can be quickly and quietly positioned to block unwanted sunlight and heat with numerous control options or may be integrated seamlessly into existing home automation systems.

- Optional heavy-duty cable guides or side channels secure fabric against wind and weather*
- Hardware (case and visible brackets) available in silver, ivory, charcoal bronze, white or black powder coat
- Weather and insect resistant solid aluminum headbox includes built-in hinge for easy installation and service
- Available in sizes up to 11' x 11'
- Wide range of fabric colors and openness choices
- Design offers superior fit-and-finish and better durability than competitive products
- Greater heat reduction and energy savings than interior window treatments
- For additional motor options *see page 8.*
- Also available in simple to install crank-operated and clutch-operated versions

*Shades for porch/patio use should be retracted in windy conditions. Some deterioration of the operator and bracket components may occur over time in coastal applications near salt water.
