

Draper® Mount Interface for Barco UniSee® Video Walls

Draper® provides a solution that makes installation of Barco UniSee® video walls easier than ever. Simple-to-install wall-mounting enables installation onto various wall construction types.

Built-in square bracing feature provides precise location of the Barco UniSee wall crosses, safely distributing the weight of the video wall evenly across the wall surface and eliminating the need for Unistrut®.

Simple and lightweight—the mount interface can be installed by one person, reducing on-site installation costs.

The configurable modular design will accommodate any Barco UniSee video wall array size, and the supporting wall does not require prep work or additional backing.

The Draper Mount Interface for Barco UniSee is a simple but precise, elegant, and affordable solution.

**FOCUSED ON
INNOVATIVE
SOLUTIONS**

CORE SOLUTION

- Compatible with UniSee video wall configurations: 2 x 2 array or larger.
- Options: compatible with Draper SmartTrim™ for Barco UniSee.
- Display sizes: 55" UniSee.
- Universal attachment bracket placement allows for most wall types.
- Diagonal cross braces for self-squaring assembly.
- Finish: textured black powder coat paint.
