SP-KPS-I—Switch with Locking Coverplate By Draper

USES: The SP-KPS-I replaces the standard single-station control switch for all products (screens, shades or projector lifts) where the directional functions (Up and Down) need to be secured behind a locking cover plate.

COMPATIBILITY*: The SP-KPS-I is intended as the sole control station, and cannot be used as a multiple station control. It can, however, be used with the KS-1 power supply key switch, although having two key switches is redundant. It is not intended for use with any other control.

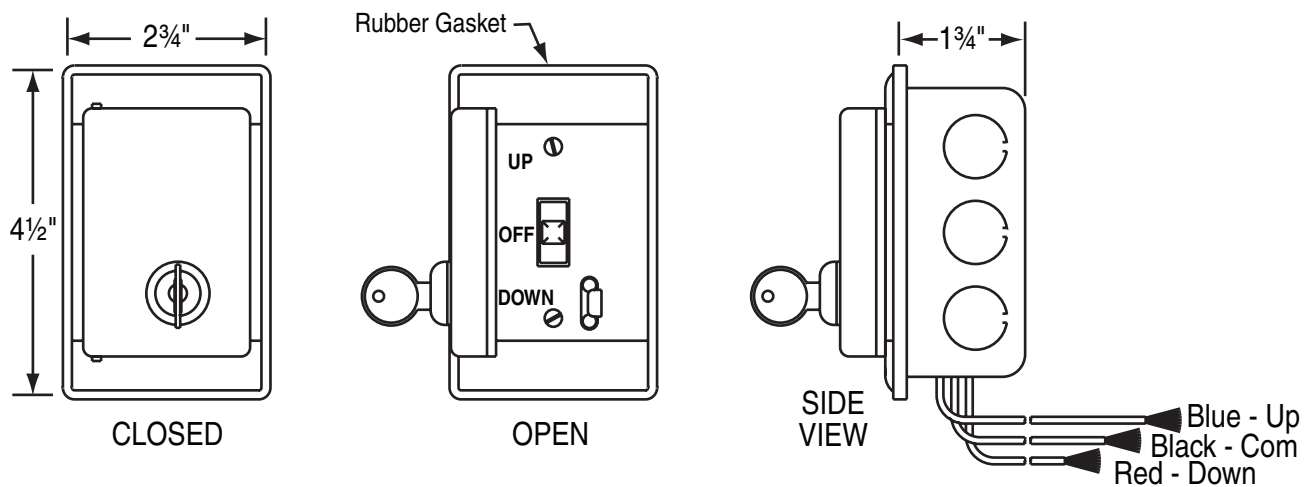

CONTACTS: Single-Pole, Double-Throw, Center off (On-Off-On). Maintained action.

RATING: 250 Volts, 5A; 125 Volts, 10A. UL recognized.

DESCRIPTION: 3-position toggle operator, ivory in color.
Cover plate and locking door is stainless steel. Two keys included.
Three 6" wire leads: black, red and blue (commons, down and up).
2¾" x 4½" cover plate fits a single-gang box (included).

PART NUMBER: 121019.
