

METAL SHADING SYSTEM s_onro® Daylighting Shutter System

EXTERIOR ROLLER SHUTTER SYSTEM

- An exterior roller shutter system, s_onro® features aluminum slats designed to provide privacy, yet still allow light and air into the room as needed. Aluminum slats offer a clean, modern look with an architectural feel. They are retractable or can be lowered for a louvered, light-filtering appearance. When the sun rises higher than 20 degrees, direct light is blocked, providing automatic glare control. As slats are lowered entirely, they collapse into a solid, opaque wall for total privacy and light exclusion. You control the openness by stopping the descent of the screen. Bottom-up stacking eliminates spacing between the slats and provides privacy by closing the lower portion of the shades while leaving the top open to natural light.

FEATURES

- System incorporates extruded aluminum side guide channels and a sill angle.
- System can be supplied with an integrated fly screen.
- Wind resistance up to 56 mph (90 kph.)
- Product designed for exterior use.

OPTIONS

- Available colors: white (RAL 9016), silver (RAL 9006), silver grey (RAL 9007), and anthracite (RAL 7016). For custom colors, contact Draper®.
- Two headbox styles available: square and round.

SIZES

- Sizes available: minimum width of 24" (61 cm), maximum width of 7' 10" (239 cm), maximum drop of 9' 10" (300 cm), and maximum area of 65 sq ft (6 sq m).
