Downloadable 3-part specifications are available at www.draperinc.com. U.S. Patent Number D395,909.

① **Select one model based on the maximum exact distance you need the projector to descend from "store" position to "service" position.**

Draper does not recommend setting show position at the maintenance/service position. For example, if you wish to have 8' (2.4 m) Show position, order a lift with at least a 10' (3 m) maintenance position.

Connecting Controls to Data Cable Splitter Board

Controls plug into the **Data Cable Splitter Board** (See diagram below) which is located on the Top Frame on the front side of the lift, using **RJ14/6P4C connectors**.

For IR or RF Remote Control, use data cable with RJ14/6P4C connectors on both ends.

For serial control of "Show" position, use data cable with RJ14/6P4C connectors on both ends and an R2D7 Serial Control Interface. Plug into the "RP/RQ" input.

Please Note:
Any control, including automated dry contact systems, being connected to the wall switch input **MUST** send a momentary signal.
