

The smartest shades are controlled with

IntelliFlex®

The shade control system with real brains

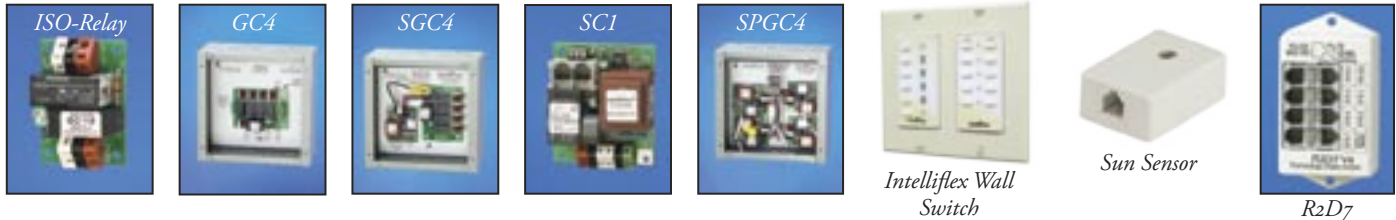

Using an INTELLIFLEX® SYSTEM, it is possible to control shades individually or in groups of almost any size, and to program the operation based on time or sunlight. Switches, panels, remote controls and RS232 operation are all possible. Contact DRAPER if you would like assistance with specifying a system to meet your needs.

- 5-year warranty against defects
- Compatible with standard DRAPER motors
- Up to four intermediate stops
- Automatic calibration
- Group panel installation or individually in junction boxes
- Programmable wall switch; more than 50 options
- Easy to incorporate with building automation systems

Dimensions, drawings and specifications available at:
www.draperinc.com/go/IntelliFlexControl.htm.

FlexShades with Hexcel Screen Vision (XL) fabric at Hancock County Public Library, Greenfield, IN. Architect: K.R. Montgomery & Associates, Anderson, IN. Installation: Fred Mann. Photography: Wayne Williams, Indianapolis, IN.

Group Control

ISO-Relay

- Up to 12 motors can be wired and controlled by one 15 amp switch.
- One relay per shade.

GC4

- Four isolating relays in a panelized version.

SGC4

- Panelized version with remote control.
- Supports bi-directional communication.

Individual and Group Control

SC1

- Six stops: fully up, four mid-window, and fully down.
- Remote control capabilities; motors can be parallel wired.
- Supports bi-directional communication.

SPGC4

- Four SC1s in a panelized version with ports for RF or IR wireless remote control.
- Supports bi-directional communication.

Controls/Input Devices

IntelliFlex Wall Switch

- Labeled switches, job overlays.
- One button: one action.
- Compatible with both group and individual controls, programmable bus, dry contact or RF.

Sun Sensor

- Automatically control shades in response to the sun.

R2D7 Professional Integration Interface

- Communicate with AV or BMS systems.

Handheld Transmitter

- Control or program shades with a remote.

Animeo IB + and Pilot PC Window Shade Automation Systems can be utilized for total building solar control automation. Please contact DRAPER for details.
