

# SMS Mounts for LCD/DLP Projectors

## Inspired Design

DRAPER SMS MOUNTS complement the latest generation of LCD and DLP projectors. But more than a shapely column, SMS MOUNTS have innovative features that simplify installation procedures.

## Function and Form

SMS MOUNTS combine stylish appearance with unique features, such as infinite height adjustment, built-in cable management and an infinitely adjustable ball joint for instant registration of the projected image.

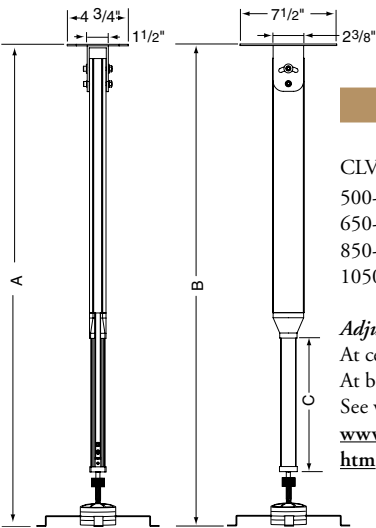

## Installer Friendly

The UNIVERSAL PROJECTOR BRACKET takes the guesswork out of projector bracket selection and attaches to your projector in seconds. Its infinite adjustability enables you to quickly find and secure the projector's center of gravity, so projector hangs level. And if you upgrade your projector, there's no need to buy a new bracket. With simplified installation procedures and the UNIVERSAL PROJECTOR BRACKET, an SMS MOUNT is an innovative and attractive ceiling mount for your projector.

## Adjustable Mounts CLV

Extruded aluminum column in your choice of five extension ranges, from 13 $\frac{3}{8}$ " to 52 $\frac{7}{8}$ ". Telescoping. Inner column has a mechanical safety stop to prevent it from disengaging from outer column. Maximum capacity 26 pounds. See dimensions below and details of features to the right. Silver finish.

### Dimensions—Adjustable Models

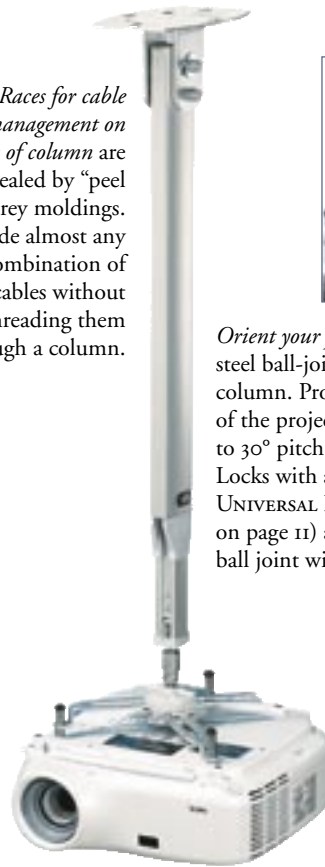

Model	A (Min)	B (Max)	C
CLV 300-350	13 $\frac{3}{8}$ "	15 $\frac{3}{8}$ "	2"
500-750	21 $\frac{1}{4}$ "	31 $\frac{1}{8}$ "	9 $\frac{7}{8}$ "
650-900	27 $\frac{1}{4}$ "	37 $\frac{1}{8}$ "	9 $\frac{7}{8}$ "
850-1100	35 $\frac{1}{8}$ "	45"	9 $\frac{7}{8}$ "
1050-1300	43"	52 $\frac{7}{8}$ "	9 $\frac{7}{8}$ "

Maximum load—26 pounds  
 Adjustability—*pitch* *roll* *yaw*  
 At ceiling plate  $\pm 30^\circ$   $0^\circ$   $0^\circ$   
 At ball joint  $\pm 30^\circ$   $\pm 30^\circ$   $360^\circ$   
 See website for more information at [www.draperinc.com/go/SMSAdjLCD.htm](http://www.draperinc.com/go/SMSAdjLCD.htm)

Races for cable management on sides of column are concealed by "peel off" grey moldings. Hide almost any combination of cables without threading them through a column.

Orient your projector quickly with the steel ball-joint located at end of inner column. Provides instant registration of the projected image and adjusts up to 30° pitch & roll and 360° rotation. Locks with a turn of two setscrews. The UNIVERSAL PROJECTOR BRACKET (details on page 11) attaches to the mount's steel ball joint with twist-lock engagement.

Inner column is infinitely adjustable within the specified range. Loosen a concealed setscrew, lower to the exact extension you need and tighten the screw.

## Accessories

### SMS Inner Column Trim

Grey trim piece for SMS CLV mount. Snaps onto smaller, adjustable part of column to cover hole in ceiling around mount.

SMS Outer Column Trim  
 White trim ring covers ceiling hole around larger part of the column on SMS CLV ceiling mount.

## SMS Projector Mount CLF 80

Fixed extension mount for installations close to the ceiling with our UNIVERSAL PROJECTOR BRACKET. Places top of projector only 6" from ceiling (\*may vary slightly according to choice of projector, and choice of mounting technique).

Ball joint at end of column adjusts infinitely up to 30° pitch, 30° roll and 360° rotation. For projectors weighing less than 26 lbs. Silver finish.
