### Graphics / Image Files Technical Specifications

#### PREFERRED FORMATS

- Adobe Illustrator
- EPS (Encapsulated PostScript)

*Illustrations should be vector-based (not simply a PhotoShop file saved as an EPS). All typography should be converted to paths (outlines).*

#### OTHER ACCEPTED FORMAT

- TIF (Tagged Image File)

*TIF should be flattened (no layers)  
CMYK color mode  
150dpi (dots per inch)*

**IMAGE SIZE:** All files should be sized exactly to the final print size.

**BLEED:** If the graphic is to bleed (if the image is to run all the way to the edge of the shade), add 1/2" to the left and right of the image size for bleed to allow for trim.

**Contact your Draper sales representative at 800-989-0126 if you have any questions about graphics specifications.**
