Specifications—505318

2³/₈" x 18" Outdoor Ground Sleeve with Neoprene Seal Cap

____ 2³/₈" x 18" Ground Sleeve with Neoprene Seal Cap, #505318 by Draper, Inc. of Spiceland, IN.

Outdoor ground sleeve shall be constructed with 2⁵/₈" OD tubing with an inside diameter of 2.41". Ground sleeve shall have an overall length of 24 1/8" and shall have a 1/2" diameter limit pin, creating a 6" debris trap at the bottom of the sleeve. Sleeve is finished with black powder coat. Cap shall be provided with a neoprene seal cap that when properly tightened with a 5/16 allen wrench (not included) makes sleeve virtually watertight.

#505318 Outdoor Ground Sleeve designed for use with Draper #505201 Tetherball System or any other 2³/₈" OD outdoor game standard requiring a sleeve with an inside depth of 18".

Installation Instructions:

- ① Dig hole a minimum of 18" in diameter and approximately 34" deep. Larger footing size may be required if soil conditions are soft or loose.
- ② Mix a sufficient amount of 3000 psi concrete (supplied by others) to completely fill hole. Fill hole to just below ground level making sure the concrete settles and fills all voids.
- ③ Submerge the sleeve with the open end facing upward in the wet concrete. The sleeve should be installed plumb and level with the stop pin exactly 18" below the playing surface. Sleeve should never extend above the playing surface. Be sure to not allow concrete to get inside sleeve or you may be unable to install the standard.
- ④ Allow concrete to properly cure per package instructions prior to installation of the standard.
