FlexShade ZIP

The motorized FlexShade ZIP is Draper's newest exterior shading product and is perfectly suited for large openings and high wind situations. The system is similar to a standard roller shade but incorporates a 'zip' detail that is welded to the two vertical sides of the fabric panel. The zip edges of the fabric panel run inside inner channels within the side guide extrusions. These inner channels secure the fabric making the product very wind resistant.

Options:

- Available in two headbox sizes and designs (standard and curved)
- Same motor and control options available as our other window shade products
- Side guides can be jamb or face mounted
- Can also serve as an insect screen
- Hardware (case and visible brackets) available in silver, ivory, charcoal bronze, white or black
- Wide range of fabric colors and openness choices (1% to 23%)

Features:

- Large enough to cover most garage door openings and multiple window sets
- Heavy-duty ZIP side channels secure fabric against wind and weather
- Weather and insect resistant solid aluminum headbox includes built-in hinge for easy installation and service
- Available to 16'5" x 16'5" depending on case size
- Very wind resistant. Wind tunnel tested up to 90 mph
- Prevents light penetration at the sides of the system and can be used as a blackout system for interior applications

Engineered for durability in the harshest environments, Exterior FlexShades offer an exceptionally clean and attractive look that is perfect for any building style. With more hardware colors and fabric choices than the competition, Exterior FlexShades are the perfect solar control solution for any window or patio area.

Motorized Exterior FlexShades with side channels

Crank-operated Exterior FlexShades with side channels

Motorized

For the ultimate in solar control and convenience choose Draper Motorized Exterior FlexShades. Easily raise or lower shades with the touch of a wall switch or remote. Motorized Exterior FlexShades can be quickly and quietly positioned to block unwanted sunlight and heat with numerous control options or may be integrated seamlessly into existing building automation systems. See back page for features.

Options:

- Available with either side channels or cable guides for secure operation in windy weather
- Same motor and control options available as our other window shade products

Exterior FlexShades™

Motorized, Crank-operated and Clutch-operated Outdoor Shades

Clutch-operated Exterior FlexShades with cable guides

Clutch-operated

Clutch-operated Exterior FlexShades are perfectly suited for patio and pool areas where solar control is needed. Attractive aluminum fascia and headbox styles match other Draper interior shade products. Stainless steel bead chain clutch operation allows for easy adjustments.

Don't surrender your outdoor spaces to harsh sunlight. Take control with Clutch-operated Exterior Flexshades from Draper.

Options:

- Available with optional cable guides for secure operation in windy weather
- Chain tension device included for safety, optional spring-loaded chain tension device available as upgrade or replacement
- Easily match hardware with interior shades

Exterior FlexShade Features

Motorized or Crank-operated Features:

- Weather and insect resistant solid aluminum headbox includes built-in hinge for easy installation and service
- Heavy-duty cable guides or side channels secure fabric against wind and weather*
- Hardware (case and visible brackets) available in silver, ivory, charcoal bronze, white or black
- Available in sizes up to 11' x 11'

Clutch-operated Features:

- Cost effective solution for outdoor solar control
- Hardware (case and visible brackets) available in silver, ivory, charcoal bronze, white or black and can be matched to interior Draper FlexShades
- Available in sizes up to 11' x 11'

**Shades for porch/patio use other than FlexShade ZIP should be retracted in windy conditions. Some deterioration of the operator and bracket components may occur over time in coastal applications near salt water.*

Exterior FlexShades— Fabric Selection

Draper offers one of the largest shade fabric collections in the industry with an array of colors, textures and characteristics sure to enhance the look of your building while meeting your solar control needs. Complement your fabric choice(s) with one of our attractive hardware finishes (silver, ivory, charcoal, bronze, white or black). Draper has been a trusted name for quality window coverings since 1902. Visit our website www.draperinc.com/go/shadefabric.htm to learn more.
