Draper FlexShade ZIP XL exterior shades with Pfifer SheerWeave 29000 fabric in Chiaro/Alpaca. Private residence in Aurora, CO

Patio not level? Eliminate visible gaps and keep bugs out!

The **NEW Align Bar** for FlexShade® ZIP exterior shades **automatically adjusts to** overcome sloped surfaces.

Align Bar: Floating extruded aluminum **attaches to** and **encapsulates** the standard ZIP hem bar to create a **sealed edge** along the slope, across the full width of the shade's bottom edge.

Maintain a uniform appearance with **finishes that blend** with the shade's hem bar, headbox, and side channels.

Includes **brush liners** along the bottom and at each side help create a consistent seal.

Overall **profile size** is only 5.17" high by 1.31" deep (13.13 cm by 3.32 cm).

Accommodates **slope differences** up to **4"** (10.2 cm).

Maximum width of **16'** (4.87 m).

Existing FlexShade ZIP shades measuring 16' wide and under can be **retro-fitted** with Align Bar.
