

MOTORIZED FlexShade® I/O DC

LOW VOLTAGE DC MOTOR — COMPLETE SHADE CONTROL SOLUTION

Motorized Window Shades with Mermet E-Screen 5% Pearl/Linen fabric
in Private Residence – Boise, ID. David Fish Photography

■ The Motorized FlexShade® I/O DC boasts a low voltage DC motor with adjustable RPM for **quiet operation, including soft starts and stops.** Comprehensive automation and integration options allow for seamless network management and adaptable control.

FEATURES

- Motorized FlexShade I/O DC uses patented technology for easy network management, with automation and integration options for any level of control that a project requires.
- Low voltage DC motor with adjustable RPM for quiet operation with soft starts and soft stops.
- Low voltage connection using RJ45 connector.
- Supports wiring distances up to 700' (213.3) from motor to power panel using special gauge (24AWG) CAT5e or CAT6 cable.
- Scalable controls to accommodate simple, moderate, and complex projects.
- Thermal overload protector and electric brake.
- Product designed for interior use.
- UL Listed.

OPTIONS

- Select right- or left-hand operation during programming.
- Coupling shades can reduce the number of motors required for a project.
- Optional Dual Rollers available upon request. See technical documents for details.
- Hardware available in clear anodized (standard), or a powder coat finish with a lightly textured surface in:
 - Black - RAL 9005
 - White - RAL 9003
 - Bronze - RAL 7022
 - Ivory - RAL 1013
 - Custom colors available

FABRIC OPTIONS

- Choose from a wide range of fabric colors, textures, and opacities — or customize with graphics, patterns, or a custom color match.
