

# SPECIALTY SHADES TESS™ 660 FlexShade®

Sidelock Tension System with blackout capability for skylights and angled glazing.

Engineered by Guthrie Douglas and manufactured by Draper for reliable performance, TESS 660 FlexShade tensioned zip delivers smooth, ultra-quiet travel with **blackout capability for skylights and angled glazing.**

- **The Draper TESS 660 FlexShade tensioned zip shade** delivers blackout performance, ultra quiet travel, and secure fabric control for any angle or direction, indoors or out.

## FEATURES

- TESS 660 FlexShade tensioned zip shade is a high-performance solution for skylights and angled glazing where blackout control is required.
- The tensioned zip design with SideLock fabric retention keeps fabric secure within the guides, preventing shifting during operation.
- A single-barrel tension system maintains consistent fabric alignment for smooth, quiet movement with no risk of jamming.
- A compact headbox and slim guides allow clean integration into the window surround.
- Includes aluminum mounting brackets.
- Motor: 9 Nm (12 rpm).
- Designed for installations at any scale, angle, or direction.
- Designed for interior or exterior use.

## OPTIONS

- Control options: radio or wired.
- TESS 660 FlexShade is available in a wide range of hardware finishes, including custom colors and durable RAL powder coat options.
- Installation options: face or reveal.

## FABRIC OPTIONS

- Choose from a wide range of fabric colors, textures, and opacities — or customize with graphics, patterns, or a custom color match.
