

SHADING THAT PERFORMS AT ANY ANGLE, ANY DIRECTION

A DIFFERENT ANGLE

Designed for skylights and complex glazing, the TESS™ 660 FlexShade® delivers smooth, ultra-quiet operation with reliable fabric control & blackout capability, at any angle.

The compact tensioning system maintains consistent draw tension to ensure a flat, elegant, controlled, motorized solution for even your most complex shading challenges — **indoors or out.**

- Width ranges from 25 ½" to 119".
- SideLock fabric retention keeps fabric secure within the guides, preventing shifting during operation.
- Consistent fabric alignment ensures smooth, quiet movement with no risk of jamming.

- Motor: 9 Nm (12 rpm).
- Radio or wired control options.
- Aluminum mounting brackets.
- Compact components for clean integration.
- Face or reveal installation options.
- Suitable for interior and exterior applications.
