#### Stall Bar with Extended Top Rail

502026—Mount single STALL BAR sections separately or in a continuous row. Each section is 2′10″ wide and 8′ high with 11 rungs of 1½″ diameter solid oak. Rungs are finished with a clear lacquer and secured to the uprights to prevent turning. Each section weighs 75 lbs. Assembly hardware and mounting instructions included.

## Deluxe Arm Strengthening Bar

**502028**—This Deluxe Arm Strengthening Bar is made of 1<sup>1</sup>/<sub>4</sub>" heavy gauge steel tubing. It is powder coated for durability. Seven rungs are in 7" increments for endurance training. Overall measurements are 63" tall and 21" wide.

502027—Arm strengthening climbing ladder is made from heavy-duty tubular galvanized steel. Upper body strength developer angles away from the wall for safety. Five rungs are bolted to the outside rails—the first four are 8" apart and the top one is approximately 10" above the others and 7" back toward the wall. Overall dimensions are 45" long and 24" wide.

## Floor Hockey Goal

**502040**—Draper's Floor Hockey Goal is 4' h x 6' w x 22" d and is constructed of 13%" O.D. galvanized tube frame with galvanized steel fittings. Floor hockey goal includes 34" white nylon net and non-

marking floor pads. Net has 14 oz. vinyl sleeves to fit tubing frame and eliminate need for lacing. Goal can be used for indoor or outdoor play. Sold in pairs.

#### Deluxe Adjustable Wall Chinning Bar

502015—The finest bar available. Wall mounting brackets and bar are constructed of galvanized steel. Bar finished with black powder coat and adjusts easily in bracket using 6" wall with lag bolts and shields. Ready to mount. 40" in length.

#### Adjustable Chinning Bar

502013—Mount Adjustable Chinning Bar to the wall for a permanent installation or to the 2" x 4" x 54" wood wall pads for adjustability and removal for storage. Solid steel frame and 11/8" diameter solid steel bar are welded together for a lifetime of chin-ups. With wood wall pads, bar is adjustable in 6" increments within a 30" range. Frame and bar have a chrome finish.

#### Stationary Chinning Bars

These one, two or three section chinning bars feature

the same quality construction as our Deluxe Adjustable Wall Chinning Bar, but are designed to mount directly to a wall.

502016—40" Single unit chinning bar 502017—82" Dual unit chinning Bar

502018—124" Three unit chinning bar

#### Wall Mounted Horizontal Ladder

502025—Side rails are 12' long and 1½" x 4" x .083" wall rectangle tubing with capped ends. Side rails are electrostatically painted. Twelve hardwood rungs are 1¾" dia. solid maple and are secured to the side rails to prevent turning. Support frames of 1¾" dia. heavy wall tubing will position the inside of the ladder 2′-6′ from the wall. 2" x 6" wood wall pads included. Assembly hardware and mounting instructions included.
