Specifications
QUANTITY: $\qquad$ SIZE: $\qquad$ h. $x$ $\qquad$ w. Projection screens, recessed ceiling mounted.

HOUSING: Case back, top, and front constructed of steel. Endcaps are steel. Bottom panel forms slot for passage of viewing surface, easily removable for access. Symmetrical housing to allow for left or right-hand motor location, and for viewing surface to unroll from the back or front of the roller. Case to include bottom flange for trim around edges of ceiling opening.
ROLLER/FABRIC ASSEMBLY: May be installed in case at factory or job site. Brackets supporting roller/fabric assembly to slide in track inside top of case, allowing viewing surface to be centered in case regardless of screen size. Roller of 3" ( 76 mm ) dia. steel.
VIEWING SURFACE: Top of viewing surfaces masked by $12^{\prime \prime}(30 \mathrm{~cm})$ black drop. Viewing surface flame and mildew resistant. Matt White XT1000V and Contrast Grey XH600V (for tab tension screens only) viewing surfaces are certified to GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information, visit ul.com/gg.
MOTOR: Electrically operated $110-120 \mathrm{~V} \mathrm{AC}, 60 \mathrm{~Hz}$. 4-wire motor mounted inside screen roller, max 1.1 amp current draw, instantly reversible, lifetime lubricated, with internal thermal overload protector and electric brake, standard motor with preset accessible switches. Optional quiet motor operates at 44 Db (motor noise is approximately $30 \%$ less than standard tubular motors). Housing to feature internal junction box, allowing it to be installed and wired to building supply wires at an early stage of construction. Junction box to have plug-in style connector, accepting the mating half of the connector from the motorized roller/fabric assembly.
CONTROLS: 3-position control switch (or switches-specify number) to stop or reverse screen at any point. Switch(es) furnished with cover plate.
MOUNTING METHODS: Case may be mounted with a ${ }^{3 / 8 "}(9.5 \mathrm{~mm})$ threaded rod, lag screws, or with wire in a grid ceiling.
MOUNTING BRACKETS: Slide in 18 " ( 457 mm ) long channels on top of case, allowing brackets to be moved to avoid interference with conflicting building structures. Brackets must be locked in position by tightening screws.
Brackets may also be angled to meet installation requirements.
PLENUM RATED CASE (UL approved "Suitable for Use in Environmental Air Space").
