

PROJECTOR FLY / STACKING CAGE

QUICK AND SECURE MOUNTING, STACKABLE FOR MULTIPLE PROJECTORS

- Draper Fly Cage provides sturdy, dependable, mounting and stacking capabilities for projectors. Manufactured from 2" (5 cm) tubing, it easily attaches to cheeseborough clamps to provide a quick, secure mounting to truss. The Fly Cage allows multiple cages to be stacked for increased projector brightness or redundancy, and provides an adjustment mechanism for precise projector alignment. Available in five sizes: small, medium, large, wide-small and wide-large. It can also be custom designed to specific sizes.

FEATURES

- Constructed of 2" (5 cm) tubing.
- It easily attaches to cheeseborough clamps to provide quick, secure mounting to truss.
- Three-axis adjustment (roll, tilt, yaw) mechanism to help with image alignment.
- Pins included to allow cages to be stacked up to three high with ground support. Up to two high when flown..
- Extremely rigid and strong frame.

OPTIONS

Available accessories include:

- Four cheeseborough clamps.
- Adaptor for attachment to 1.5" NPT steel pipe.
- Adaptor for single point attachment with cheeseborough clamp.

SUPPORTING DOCUMENTS

All instructions, technical drawings and other supporting documents are located at: draperinc.com/documents.aspx

SIZES

- **Small (frame)** 40.25" L x 30" W (102 L x 76 W cm)
Fits Projector Sizes <35" L x <19" W (<89 L x <48 W cm)
- **Medium (frame)** 43" L x 37" W (109 L x 94 W cm)
Fits Projector Sizes <35-38" L x <19-26" W (<89-97 L x <48-66 W cm)
- **Large (frame)** 55" L x 40" W (140 L x 102 W cm)
Fits Projector Sizes <38-50" L x <26-29" W (<97-127 L x <66-74 W cm)
- **Wide-small (frame)** 28" L x 35" W (71 L x 89 W cm)
Fits Projector Sizes <23" L x <24" W (<58 L x <61 W cm)
- **Wide-large (frame)** 30" L x 41" W (76 L x 104 W cm)
Fits Projector Sizes <23-25" L x <24-30" W (<58-64 L x <61-76 W cm)
- **Custom designs to specific sizes available.**
