

EXTENDABLE VIDEO WALL MOUNT

The Extendable Video Wall Mount offers a premium solution for video wall display units by providing easy access for service or exchange. Each mount contains a spring-mounted extension mechanism that you use to move the display out away from the wall. This avoids the necessity of having to remove other displays in the array, saving time and money.

Fine adjustment capabilities with millimeter precision provide perfect display alignment and edge-to-edge mounting. Each display mount can be secured with screws (included) or with padlocks (not included) to increase public safety and reduce the risk of theft.
