#### ClearSound Family of Surfaces

The ClearSound family features premium acoustically-transparent viewing surfaces. Available with standard or microscopic perforations and fine-weave acoustically-transparent fabrics that allow sound to travel through the fabric. This ensures the highest quality experience in audio visual applications by providing a cinematic experience. The combination of self-supporting and tensioned surfaces means that almost any Draper projection screen model can be provided with a ClearSound viewing surface. Each formulation or surface is available in NanoPerf up to 102" tall. All are 4K ready.
