

Extra Wide Viewing Cone/High Contrast/On-Axis Gain of 0.7

- 0.7 on-axis gain, Premium Contrast Grey.
- Low/moderate ambient light.
- Ultra-short and short throw projection, blending, or deeply curved screens.
- Increased contrast and stray light absorbing.
- Excellent uniformity.
- Lens/Throw distance ratio for best uniformity: no minimum.

Surface Characteristics

- Maximum image height: 22' optically seamless.
- Weight (g/sm): 445
- Thickness (mm): .36
- Cleaning: Mild soap and soft cloth.
- Flame and mildew resistant.
- Composition: Flexible PVC.
- Also available in a nano perforated option up to 96" in height.

Reflective Performance*

- Gain Chart: See below.
- 0° Gain: 0.7
- Half Gain Angle: Material does not reach half gain.

**Individual test results may vary slightly.*

TecVision® is an exclusive line of premium projection surfaces designed, formulated, and manufactured by Draper® to exacting standards for unparalleled uniformity, performance, and quality.

TecVision surfaces are available in 3 categories to fit any application:

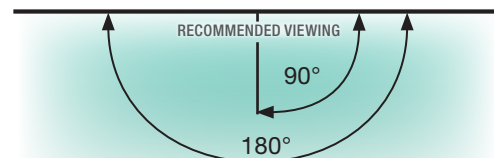

- **Performance/Reference Whites for dark spaces/controlled lighting.**
- **Premium Contrast Greys for increased contrast in controlled light applications.**
- **Ambient Light Rejecting (ALR) for uncontrolled light applications.**

All TecVision surfaces are 8K-ready and certified color-accurate by the Imaging Science Foundation (ISF).
