

ELECTRIC Access MultiView V

CEILING-RECESSED, TAB-TENSIONED

- The Access MultiView V features a dual-masking system with two different aspect ratios. The dual masking system features the ability to quickly convert from one screen size to another to create a new viewing format. The bottom closure panel provides access to all components for easier service and maintenance.

RF welded tabs eliminate stickiness and tab separation. Tabs warranted against separation for five years. Tab-tensioned screens provide a perfectly flat viewing surface with better image quality.

FEATURES

- Image area fully framed with black. Standard 12" (30 cm) black drop at top of viewing area.
- Flat black mask on second motor-in-roller converts projection screen to an alternate viewing format by masking the right and left sides of the viewing surface.
- Sliding brackets on top of the case allow for adjustments for mounting.
- Bottom closure panel detachable or hangs in place with "T" bracket to provide accessibility for service or maintenance.
- Height of viewing surface remains constant.
- Ceiling-recessed: viewing surface retracts completely into the case providing complete concealment.
- Includes two 110V, 3-position switches (standard).
- WARRANTY: One year against defects in materials and workmanship.

OPTIONS

- **Quiet low-voltage motors** and 220V options are available.
- **Control options:** Low voltage, video interface or other controls can be built into housing for below ceiling access.
- **Viewing Surfaces:** TecVision®, OptiFlex™ (tensioned), CineFlex™ (rear projection), and ClearSound™ families.
- White case standard, black available upon request.

SUPPORTING DOCUMENTS

All instructions, technical drawings and other supporting documents are located at: draperinc.com/Documents.aspx
