

ELECTRIC Access E

FREE-HANGING, CEILING- RECESSED

Davenport University, Grand Rapids, MI
Photography: Don Kreski for Crestron Electronics

- Access E electric projection screen is an ideal fit for small- to medium-size spaces, such as boardrooms, mid-sized training rooms, universities, or home theaters. The bottom closure panel provides access to all components for easier service and maintenance. Installation of the case during the initial phase of construction eliminates job site damage, allowing for installation of the screen at a later time.

THIS SCREEN IS FREE-HANGING
Free-hanging, fiberglass-backed projection screen maintains flatness thanks to the weight of the screen and bottom dowel.

FEATURES

- The standard Access is a good alternative whenever the above-ceiling space permits. Access Fit is recommended when space is at a premium.
- Adjustable or removable hoisting brackets included for easy lifting during installation.
- Black drop standard, depending on screen size. Extra drop above image area available upon request. Extra drop may increase case size.
- Sliding brackets on top of the case allow for adjustments when mounting.
- Sliding brackets inside case accommodate different size screens.
- Bottom closure panel detachable or hangs in place with "T" bracket to provide accessibility for service or maintenance.
- Quick-connect wiring allows for early installation of the case with the addition of the screen later.

- Includes a 110V, 3-position switch (standard).
- Low voltage, video interface or other controls can be built into housing for access from below ceiling.
- White case standard, black available upon request.
- WARRANTY: One year against defects in materials and workmanship.

OPTIONS

- **Viewing surfaces:** OptiView™ and ClearSound™ families and Chroma Key Green.
- Quiet, low voltage motors and 220V options are available.
