

FIXED SCREEN CLARION

DESIGNED TO BE WALL-MOUNTED

Callaway House Residences, Austin, TX., Dealer: Capitol Bind & Drapery, TX.,
Photography by: Matt Oberer of MattO Photo, Albuquerque, NM.

■ With a truly flat viewing surface, the fixed frame Clarion projection screen features better image quality. The value of a fixed frame is the method used to attach the screen to the frame. Clarion's screen is stretched behind the beveled perimeter frame to create a taut viewing surface. This results in better image quality making it ideal for boardrooms, conference rooms, universities, or home theaters. The black frame forms an attractive border that offers a clean, theater-like appearance. The Clarion is available for custom curved applications; please contact Draper for more information.

Fixed frame projection screens are engineered for easy assembly and to provide a perfectly flat, taut viewing surface.

FEATURES

- Fixed screen designed to be wall-mounted. Mounting fasteners not included.
- Standard black aluminum frame forms attractive 2" (51 mm) border, for a clean, theater-like appearance.
- Screen attaches to the frame without snaps or tools. Viewing surface is perfectly flat for better image quality.
- Includes Z-clip wall mounting brackets for easy installation.
- **WARRANTY:** One year against defects in materials and workmanship.
- **US PATENTS:** [legal/patents/](#)

OPTIONS

- Vel-Tex finish available. Vel-Tex is a black, velvety textile covering that conceals all trace of joints in the frame and eliminates reflections on the frame.
- Optional Corner Reinforcement Kit required for flown screens or any Clarion with a viewing area 120" (305 cm) or greater (height or width).
- **Viewing Surfaces:** TecVision®, OptiFlex™ (tensioned), CineFlex™ (rear projection) and ClearSound™ (acoustically transparent) families.
