

# FIXED SCREEN PROFILE+

DESIGNED TO BE WALL-MOUNTED AND/OR FLOWN

- Mimics the flat panel look with a thin bezel frame, the Profile+ fixed frame screen offers larger sizing options, making it ideal for home theaters, churches, and corporate training rooms. A zero edge (borderless) option incorporates a screen attachment system supported by extruded aluminum baffles on all four sides to provide an optically seamless framing system. Screen ships unassembled, making transportation to the installation site easier and maneuvering around stairs, elevators, and corners manageable. Engineered with a lighter frame and a viewing surface that is easy to attach. This mullion-less display allows adjacent screens to come together with “zero” separation. Ships with wall brackets standard, flown brackets must be requested.

Fixed frame projection screens are engineered for easy assembly and to provide a perfectly flat, taut viewing surface.

## ZERO EDGE (BORDERLESS) FRAME SYSTEM AVAILABLE

### FEATURES

- Fixed frame screen, can be wall-mounted or flown. Mounting fasteners not included.
- Frame equipped with mounting flanges that match wall brackets.
- Ships with wall brackets standard, flown brackets must be requested.
