

TECVISION XH700X GREY

PREMIUM HIGH CONTRAST GREY SURFACE

EXTRA WIDE VIEWING CONE/HIGH CONTRAST/ON-AXIS GAIN OF 0.7

XH700X Grey viewing surface performs best in moderate ambient light when optimal uniformity is desired and wide viewing angles (blending and blending on screens with great curvature). Like all TecVision surfaces XH700X Grey offers superior quality, consistency, uniformity and is 8K ready. Also available with acoustically transparent perforated or nano perforated surfaces in limited sizes.

– Lens/Throw distance ratio for best brightness uniformity: no minimum.

SURFACE CHARACTERISTICS

- Maximum Image Height: 276" (701 cm) Always optically seamless
- Weight (g/sm): 445
- Thickness (mm): .36
- Cleaning: Mild soap and soft cloth
- Flame and mildew resistant
- Composition: Flexible PVC

REFLECTIVE PERFORMANCE*

- Gain Chart—See below
- 0° Gain: 0.70
- Half Gain Angle: Material does not reach half gain, minimum gain: 0.6

**Individual test results may vary slightly.*

The TecVision Family of Surfaces

TecVision™ Engineered Surface Technology is offered in several exclusive formulations on Draper tab-tensioned and permanently tensioned screens. These formulations are designed to optimize performance and color fidelity in a broad range of settings and at a variety of light levels. White surfaces with gains ranging from 1.0 to 1.8 provide remarkably wide viewing cones. ALR surfaces offer excellent performance under higher room light levels. Other formulations offer performance needed for specific applications like blending and short throw applications in controlled ambient light, or 3-D.
