

Overview

The Motor Limit Tool is used to program the limits, operating direction and preset stops for individual or networks of Draper intelligent motors.

Features

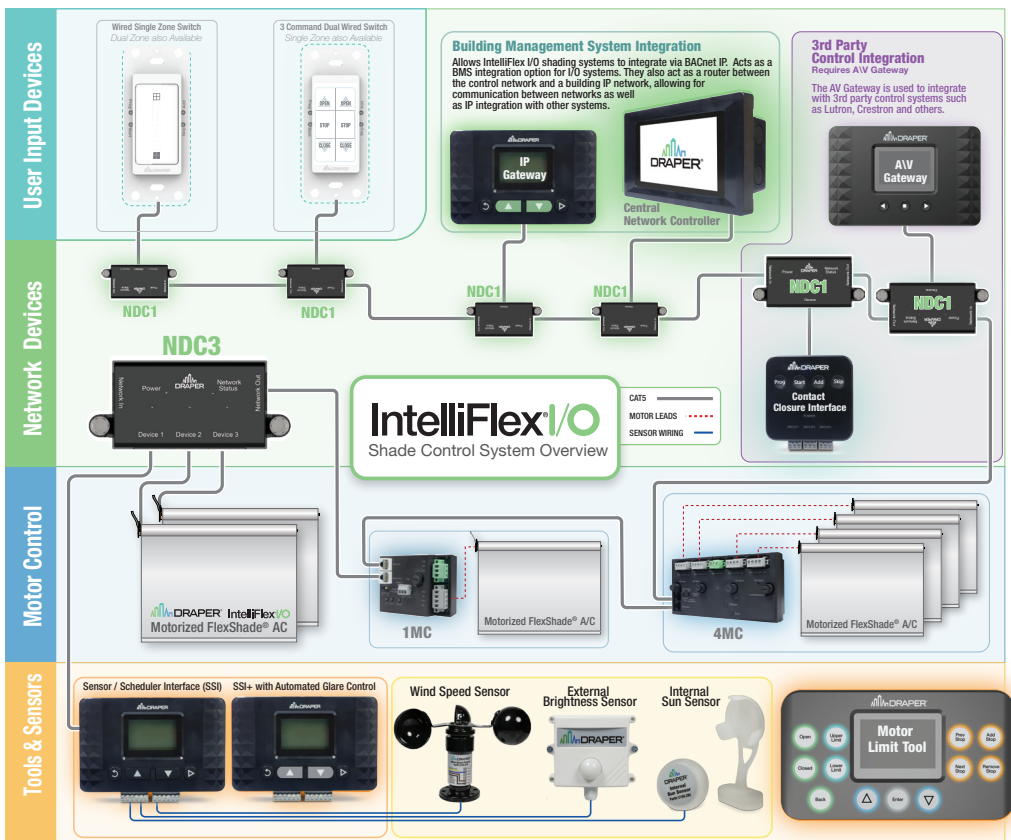

- Can be connected to an individual motor or to the network to program all motors at once.
- LCD display gives feedback to the user to make the process easier.
- Motor limits and stops can be copied and pasted to other motors in the network.
- Allows the user to factory reset the network back to the default state.

For low voltage wiring requirements, Draper recommends consulting with a professional low voltage electrical contractor.

All low voltage wiring must be run separately from line voltage wiring.
