

SPECIALTY FABRIC LIGHTBLOC MOTORIZED FLEXSHADE®

NO LIGHT GAP

LightBloc Motorized FlexShade® Ursuline Arts Center, Louisville, KY., Dealer: Kentucky Window Coverings.
Photography: Kenneth Hayden, Louisville, KY.

- The LightBloc Motorized FlexShade® window shade features a unique Fabric Retention System that keeps fabric in the side channels for a complete blackout experience. Ideal for audiovisual presentations or room darkening applications in laboratories, schools, hospitals, or atriums.

FEATURES

- Precision engineered and custom built for each opening to eliminate light gap.
- Fabric Retention Systems only available with the SB9000 and SB9100 fabric.
- Includes aluminum headbox (recess or surface mount), side and sill channels.
- Jamb mount is standard.
- Product designed for interior use.

OPTIONS

- Hardware finish choices: clear anodized (standard), black, white, ivory, or charcoal bronze.
- [Motor control options.](#)

SIZES

- Available in sizes up to 8' wide x 12' high (244 cm x 366 cm), depending on fabric selection.
