

SheerWeave Vinyl Coated Polyester Style 4500/4550/4600/4650/4800/4901/4903 by Phifer

Health Product Declaration v2.1.1

created via: HPDC Online Builder

CLASSIFICATION: 12 05 13.00 Furnishings: Fabric
PRODUCT DESCRIPTION: The SheerWeave 4500/4600 Series sun control fabrics are full basketweaves designed to meet the most stringent design standards. The SheerWeave 4500/4600 series are thinner, lightweight vinyl coated polyester fabrics. Woven in a 2x2 basketweave, the 4500 and 4600 fabrics are ideal for applications where a more opaque and non-directional fabric is needed. The SheerWeave 4800 series is woven in a dense plain weave to limit directional visibility for improved privacy while allowing natural light to enter the room. Using a unique twill weave pattern, SheerWeave styles 4901 and 4903 create two fabrics in one, as distinct, yet complimentary colors are exposed on the face and back.

Section 1: Summary

Basic Method / Product Threshold

CONTENT INVENTORY

Inventory Reporting Format

- Nested Materials Method
- Basic Method

Threshold level

- 100 ppm
- 1,000 ppm
- Per GHS SDS
- Per OSHA MSDS

Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.1, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-1-standard

SHEERWEAVE VINYL COATED POLYESTER STYLE 4500/4550/4600/4650/4800/4901/4903

PRODUCT THRESHOLD: 1000 ppm

RESIDUALS AND IMPURITIES CONSIDERED:
Yes

RESIDUALS AND IMPURITIES NOTES: No residual content (1,000 ppm & 10,000 ppm) reported for any ingredient present in the final Phifer SheerWeave product formulations.

OTHER PRODUCT NOTES:

POLYVINYL CHLORIDE (PVC)

ID: 9002-86-2

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

Phifer is committed to reducing its environmental impact from raw materials, manufacturing processes, and finished products. From internal initiatives in water and energy conservation and waste reduction to the development of our active reclamation project, Phifer leads in environmental stewardship. We were the first company in the window coverings industry to achieve GREENGUARD certification and continue to maintain the highest level of air quality recognition across all product lines. Associated Hazard Notes: The HPD is an Open Standard Format for Chemical Inventory of the Phifer SheerWeave 4500/4550/4600/4650/4800/4901/4903 Series products and does not involve a toxicological risk and exposure assessment of the CAS #s present in the product formulation. The hazards identified with each CAS# may, or may not, be associated with the application of the final SheerWeave 4500/4550/4600/4650/4800/4901/4903 Series products.

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
