VOC Emissions	GreenGuard Children and Schools Certified	GreenGuard Children and Schools Certified

** In the mesh portion of the curtain, Draper grommets are set in welded vertical strips of solid vinyl, whereas the Porter no. 670 curtain, the grommets are directly set in mesh.

IMPORTANT: All Draper Fold-Up gym divider curtain seams run vertically and are electronically welded with a 1" full contact weld. Vertical seams are inherently stronger in a gym divider curtain than horizontal seams because the weight of the curtain pulls with the weld, rather than against it.
