

Antimony- and halogen-free textiles

Sustainable performance. Future-proof quality.

In a time when environmental awareness, health and regulatory compliance are becoming increasingly important, antimony- and halogen-free textiles are gaining significance. They represent a new generation of technical fabrics that combine high functionality with responsible material choices.

As an innovation-focused producer of technical textiles, Junkers & Müllers consistently focuses on sustainable material concepts, developing antimony- and halogen-free solutions that unite performance, safety and long-term reliability.

Our flame-retardant, antimony- and halogen-free textiles:
