

Features & Benefits

Ensuring supply of quality and consistent product whilst supporting Australian jobs and the economy.

Low-emitting and contributing to improved air-quality, our products meet some of the world's most rigorous standards for low emissions and volatile organic compounds into our environments.

Stringently tested for colourfastness to light, ensuring fabrics will stand the test of time.

Protected by StainProtect™ which repel stains and spills, keeping your fabric looking newer for longer.

Australian Standards only.
AS1530.3 Results available upon request.

Highest UPF rating, providing "Excellent Protection" from the harmful ultraviolet radiation. Our fabrics let through 0.000 of UVA and 0.000 UVB rays ensuring quality protection from the sun, protecting you and your home.

Fabrics containing PVC and Lead can not only emit carcinogens in the home, the manufacturing process is also 'dirty' as toxic and carcinogenic components are required for manufacture. Hence why we only develop PVC and Lead Free Fabrics, better for you and the environment.

Giving you peace of mind and long lasting quality.

Wilson Fabrics Blockout Coated fabrics are full blackout that surpass blackout standards.
