LVC-IV Low Voltage Control Wiring Diagrams for All Draper Products

Technical Specifications:
- Power Supply: 110V-120V / 60Hz
- Temperature: -40° C ~ 85° C
- Frequency: 433 MHz
- Power: <300W
- Transmit Power: <10mW
- Sensitivity: -110dBm
- Fuse: 3.15 Amp

Notes:
- Don’t let the RF receiver touch metal objects; this could affect the maximum distance the transmitter can be from the RF receiver.
- Disconnect the power supply before installing the RF receiver.
- Avoid electrostatic interference: Static electricity will damage the electronic components.
- Make sure there is more than 5 feet between the RF receiver and ground.
- Make sure there is more than 1 foot between the RF receiver and ceiling.
- Make sure there is more than 1 foot between the RF receiver and transmitter.
- If using more than one receiver, make sure they are separated by more than 8 inches.

Radio Frequency (RF) Remote Control

The LVC-IV comes with built-in Radio Frequency Remote control capability (optional handheld transmitter NOT included).

To "Learn" a remote:
1. Press receiver button on LVC-IV (see Fig. 2A).
2. Signal light will flash slowly.
3. Press transmitter’s Up button within 10 seconds (see Fig. 2B).
4. Signal light flashes three times quickly.

To "Un-Learn" a remote:
1. Press receiver button on LVC-IV (see Fig. 2A).
2. Signal light will flash slowly.
3. Press transmitter’s Down button within 10 seconds (see Fig. 2C).
4. Signal light flashes three times quickly.

To "Un-Learn" all remotes:
1. Press receiver button on LVC-IV until signal light flashes quickly, then release.
2. Press receiver button once while signal light is flashing.
3. Signal light will stop flashing.

Please Note: Operating range is 250ft (open distance). RF Signal will degrade significantly with each wall it is required to penetrate. If you are experiencing issues with RF signal strength, the RF antenna can be threaded out one of the knockouts for better reception.

InfraRed (IR) Remote Control

1. Plug Optional IR Eye into mini plug input provided on LVC-IV (see Figs. 1 and 3).
2. IR Remote Control transmitter does not need to be "learned" by the LVC-IV. Simply point and operate.
3. Maximum IR Eye cable length is 42''.

Please Note: IR Transmitter Range is 26ft.

DC Low Voltage Trigger

The LVC-IV comes with built-in connection for sending a DC trigger (5-28 VDC) from the projector to the projection screen.
1. Connect remote trigger voltage from projector to the low voltage trigger cable.
2. Plug the mini-jack plug of the low voltage trigger cable to the LVC-IV (Figure 1 & 4).
3. When projector is ‘ON’ the low voltage output of the projector will cause LVC-IV to deploy projection screen.
4. When projector ‘OFF’ the low voltage is removed from LVC-IV and projection screen will retract into case.
**External LVC-IV—Single or Multiple Wiring Diagram for Ambassador and Rolleramic**

**INTERNAL SCREEN WIRING**

- **White (Common)**
  - Red (Up)
  - Black (Down)
  - Green/Yellow (Motor Ground)
  - To 110-120 VAC Line
  - N
  - GND

- **Red-to screen (directional)**
- **Brown-to screen (directional)**
- **Yellow-to 110V-220V AC-Hot**
- **Black-to 110V-220V AC-Hot**

- **White—Common to screen & 110V-220V AC Neutral**
- **Green/Yellow (Ground)**

**Location of key operated on-off switch if furnished.**

- Dashed wiring by electrician
- Low voltage wiring by others

**3 Button Wall Switch**
- DOWN - Black
- COM - White
- UP - Red

**Electrical Straight Data Cable to more LVC-IV modules**

**FUSE - 3.15 AMP**

**250 VAC 5x20mm**

**RS232/485 Inputs/Outputs**

**IR Eye Input**

**Low Voltage Trigger**

**5-28 VDC**

**Low Voltage**

**IR Eye Input**

**A maximum of six (6) LVC-IV modules can be linked together.**
RS232 / RS485 CommPort Parameters:
① Frequency (BAUD Rate): 2400
② Data long code : 8
③ Parity Check : N
④ Start bit : 1
⑤ Stop bit : 1
⑥ Flow Control : NONE

Please Note:
Connections using modular cable must be made using electrically straight 6-conductor modular cable (RJ25). This means colors do not cross over: blue leads to blue, green to green, etc. (see diagram at right)

LVC-IV—Dimensions

Use the appropriate screws and hardware to mount the enclosure through the four key holes provided. Use largest size fastener that will fit in key holes.

For AC supply wires attach appropriate ½" Trade Size connector to route wiring through knockouts. For low voltage wires attach with appropriate connector to route wiring through knockouts. Knockouts are provided on all fours sides of the enclosure.
