Repair Instructions
StageScreen Projection Screen Bungee Loop Replacement by Draper

Caution
① Read instructions through completely before proceeding; retain for future reference.
② Handle viewing surface with care; do not allow it to come in contact with sharp or dirty objects and place it on a clean surface before beginning work.
③ Be extremely careful. Knife may slip and cause injury to fingers.

Kit Includes:
- Replacement Bungee Loop
- Replacement Pull Tab

Tools Required:
- Black Gaffer Tape
- Knife
- Small Screwdriver
- Scissors

① Carefully make a slit on the BACK SIDE of the black border, in a straight line from the edge of the border down. DO NOT cut through stitching in the border, or through the front side of the border (see Fig. 1).

⚠️ Caution: Be extremely careful. Due to material thickness knife may easily slip and cause injury to fingers.

② Pry out the broken bungee loop using a small screwdriver (see Fig. 4).

③ Carefully make a second slit in a straight line directly across the first slit and below the bottom of the plastic bungee attachment points (see Fig. 2). DO NOT cut through the front side of the border.

④ Make sure area is clear of broken pieces (see Fig. 5).

⑤ Thread one end of the Bungee Loop Replacement down through one of the plastic hole openings (see Fig. 6).

⑥ Tie a knot in Bungee below the plastic hole (see Fig. 7).

⑦ Place Pull Tab on Bungee. Pull Bungee tight so that knotted end is fully seated in plastic saddle.
⑧ Thread Bungee back down through the remaining plastic hole. Tie a knot in the other end of the Bungee. Make sure height of new Bungee Loop will equal other loops (see Fig. 8).

Please Note: The two cuts should create a butterfly opening and allow access to bungee attachment points.

If you encounter any difficulties completing this repair, call your dealer or Draper, Inc. in Spiceland, Indiana, 765-987-7999, or fax 765-987-7142.
① Cut off excess Bungee, making sure to leave some excess bungee beneath the knot (see Fig. 9).

② Inspect to make sure new Bungee Loop is seated correctly.

③ Applying **normal** pressure, tug to make sure the replacement Bungee Loop will hold.

④ Apply black gaffer tape over the repair area to cover the cuts (see Fig. 10).

⑤ Once the repair is completed and the black gaffer tape is in place, the repair site on the back side of the border should be virtually invisible from a distance. (see Fig. 11).
