Assembly Instructions

Anti-Sway Stabilizer for UFS Projection Screen by Draper

**Leg Assembly**

1. Attach optional Anti-Sway Stabilizers to inside of legs and bottom of frame using included leg clamps.
2. Anti-Sway Stabilizers can be adjusted so they are further up or down the legs. Place and adjust so that the Anti-Sway Stabilizers avoid snaps and hinges.
3. Make sure Leg Clamps are completely hand tightened.

**Caution**

1. Read instructions through completely before proceeding; retain for future reference.
2. When attaching Anti-Sway Stabilizers to frame and legs, take care to avoid rocking the screen and causing it to fall.
3. Handle with care; do not allow Anti-Sway Stabilizers or Leg Clamps to come into contact with the viewing surface; this could rip the fabric.
4. Make sure Leg Clamps are completely hand tightened.

If you encounter any difficulties installing your Anti-Sway Stabilizer Bars, call your dealer or Draper, Inc. in Spiceland, Indiana, 765-987-7999, or fax 765-987-7142.
