

VIDEO CONFERENCING BACKGROUNDS

An array of video conferencing backgrounds for a more immersive communication experience.

MAKE YOUR TELEPRESENCE MORE IMMERSIVE

Draper offers three unique types of backgrounds to bring your video conferencing to life. If video conferencing is important to your business, why not choose a background that sets your content apart? Video Conferencing Backgrounds are offered in a range of standard sizes (custom sizes by quotation).

Neutral Backgrounds

Eliminate distractions for your camera and your viewers with soothing neutral backgrounds in six muted earth tones (Reef, Glacier, Beach, Savannah, Desert and Tundra) shown below. Prevent unwanted interference, control room lighting, and ensure a consistent corporate image worldwide with a Draper Neutral Background. They are the perfect way to add the atmosphere of a dedicated video conferencing space to existing meeting rooms, offices, or anywhere video conferences could occur.
