VENETIAN BLINDS

BY WAREMA

MOTORIZED EXTERIOR SOLAR CONTROL

- Creates just the right amount of daylight by preventing glare thanks to the system’s ability to retract, extend, or tilt the slats. Exterior and dual facade applications provide effective solar control and thermal comfort with optimal daylighting. They can be used for new buildings or renovations, and are appropriate for commercial, institutional, retail, and residential applications.

FEATURES
- Automation available for maximum indirect light.
- Superior solar heat gain control.
