### Safety Information

#### Important Safety Information

**WARNING**

Improper installation and use of the Exterior Motorized FlexShade® can result in serious injury or death. Primarily, injuries can occur if the unit falls due to imprecise installation, mishandling of the unit during installation, or installation on an insufficient wall or ceiling structure. Please use extreme care.

1. Please read the following installation guidelines thoroughly and follow them carefully. Failure to do so may cause product to fall or otherwise fail, and could result in serious injury.

2. Installation and calibration of the unit should only be performed by an authorized, qualified, and experienced professional. In particular, electrical work and wiring [indicated in diagram by dashed lines] must be completed only by a qualified professional electrician who has read this manual completely and is familiar with the construction and operation of this equipment and the hazards involved.

3. Do not affix the unit to walls or ceilings that have inadequate strength to permanently hold the unit during use. It is the owner’s and installer’s responsibility to confirm the wall or ceiling to which the unit attaches is sufficient to permanently hold the weight and stress loads of the unit at all times. Draper®, Inc., is not responsible for improper installation, application, testing, or workmanship related to the product at place of installation.

4. It is the installer’s responsibility to make sure appropriate fasteners are used for mounting.

5. All brackets, fascia, headboxes, pockets, wall clips, and other hardware must be installed level. Unit must be level and square.

6. Never leave the area while operating the unit during installation, maintenance, or normal operation, unless it is secure and safe.

7. Before testing or operation, carefully inspect the entire area and path of the shade and areas underneath the shade to be sure no persons or objects are in the area.

8. Turn off power and any nearby equipment or cables carrying electricity before connecting switches, wires, controls, or electrical components.

9. Make sure the limit switches are pointed down or accessible when placing the motor in brackets/endcaps.

10. All motors should be tested and limits set using test cord before shades are wired.

11. Do not wire motors in parallel without written permission from Draper, Inc.

12. During testing or operation, carefully watch the surrounding area for any potential safety concerns including nearby persons or objects.

13. Do not use an extension cord. If the power supply cord is too short, have a qualified electrician install an outlet near the drapery operator.

14. After installation, the entire system, including all sensors, should be carefully tested to ensure safe and normal operation. Extreme care should be taken during testing to remain clear of moving parts to avoid possible injury.

15. Operation of unit should be performed only by authorized and qualified personnel, who have been trained in the safe and effective operation of the unit and understand its safety features.

16. The safety features of the unit, including sensors, should never be disabled, bypassed, or overridden. The system should not be operated until all safety features, including the sensors, are properly and completely installed, calibrated, and tested.

17. Unit may need to comply with local, state, or district rules and regulations, in particular when installed in schools. All applicable rules and regulations should be reviewed before installation and use.

18. Failure to precisely follow installation guidelines invalidates all warranties.

19. Custom products/installations may not be reflected in this manual. Call Draper, Inc., if you have questions about the installation of custom products or any questions about your installation.

#### Before Beginning Installation

1. Look for any job site conditions that could interfere with installation or operation of the system.

2. Read carefully and be sure to understand all installation instructions and all related operations manuals. These instructions are intended to serve as a guide for the installer and owner. They should be followed closely and combined with the expertise of experienced qualified installers. Draper, Inc., is not responsible for improper installation, application, testing, or workmanship related to the product at place of installation. Please retain all instructions for future use.

3. Open cartons lengthwise.

4. Locate and lay out all pieces.

5. Inspect all boxes to make sure you have received the proper shade and parts. Controls may be shipped separately, or in same carton as shade.

6. If you have any difficulties with installing, servicing, or operating your shade, call your dealer or Draper, Inc., 765-987-7999.

### Field Adjustments

Each Draper Solar Control Shade is tested to ensure proper operation. Even with this testing, some field adjustments may be needed for telescoping.

If the shade is telescoping, place a piece of shimmering fabric into the fabric roll when the shade is deployed on the side that the fabric will be drawn toward. For example: if the fabric is tracking to the left, place the shimmering fabric on the right side.

### Cleaning and Maintenance

Window covering products manufactured by Draper, when properly installed, should require no operational maintenance or lubrication.

Most standard Draper fabrics may be cleaned at the window by vacuuming with a soft brush attachment. They also may be cleaned by using a sponge or soft cloth and mild solution of warm soapy water. A mild dishwashing liquid is recommended. A clean dry cloth is recommended for the metal finish.

Please Note: Exceptions are GreenScreen Evolve®, GreenScreen Revive®, and Phifer® SW7000 fabrics, which must be cleaned with a dry art sponge.

(GreenScreen Revive® and GreenScreen Evolve® are registered trademarks of Mermet USA. SheerWeave® is a registered trademark of Phifer® Incorporated.)
Section 1 - Preparation for Installation

⚠ Caution: Before mounting shades, verify measurements on label provided with shade, and ensure unit is installed at correct width.

Please Note: Installer is responsible for selecting mounting hardware appropriate for site conditions.

1. Ensure mounting surface is strong enough to hold the Exterior Motorized FlexShade®.
2. Verify unit measurements and make sure it will fit in the desired location.

Section 2 - Mounting Headbox with Brackets

⚠ Caution: Mounting Brackets required for proper spacing of unit off the wall for Side Channel alignment.

1. Attach Mounting Brackets to the wall using #10 flat head screws installed flush with bracket.

Please Note: Be sure to use AT LEAST 2 of the top mounting holes.

2. Attach Headbox to brackets and tighten Set Screws.

3. Mount the Side Channels (Section 4).
Section 4 - Installing Side Channels Option

1. Use 3 mm Hex Wrench to remove Screws from Side Channels and Side Channel Covers (Fig. 5-A).

   Please Note: Do NOT remove the Bottom Caps from Side Channels.

2. Drill Side Channels at desired mounting points.

3. Mark wall or jamb and drill small pilot holes in mounting surface (Fig. 5-B).

   Please Note: Recommended attachment of Side Channel to structure is minimum of every 24" (61cm).

4. Attach side channels to wall/structure (Fig. 5-C).
**Section 5 - Attaching Side Channels to Mounted Headbox**

**IMPORTANT:** Side Channels must be installed parallel, plumb, and square, with a tolerance of +/- ¼" (3mm).

1. **Insert** Side Channel Guide into Side Channels.

2. **Engage** Side Channel Guide with extrusion on the back side of Endcap.

3. **Insert** Hem Bar into Side Channel, ensuring that side channel remains properly engaged with Endcap extrusion.

4. **Repeat** for the opposite Side Channel.

5. **Re-attach** Side Channel Covers, replacing the screws removed in Sec. 4, Step 1.

**Please Note:** Failure to use provided fasteners to re-attach Side Channel covers may result in product failure in high wind.
Section 6 - Installing Cable Guides Option

1. Install Mounting Bracket using appropriate fasteners. 
   (Wall mount option shown.)

2. Place washer and nut approximately halfway up threads of bolted end of cable to allow space for travel.

3A. Pull cable up, through the Mounting Bracket

3B. Pull cable up, through Cable Mounting Hole on Endcap. 
   (Wall mount option shown.)

4. Pull cable taut and mark cable under Cable Mounting Hole with pencil. 
   (Wall mount option shown.)
5. Undo washer and nut, and pull cable up to allow for working clearance. (Deck mount option shown).

6. Strip cable to pencil mark.

7. Thread barrels onto stripped end of cable, above the Cable Mounting Hole on Endcap.

8. Crimp the barrels approximately 1/8" (3mm) above pencil mark.

9. Trim excess cable as desired.

Section 7 - Replace Roller Assembly

1. A. Replace Motor End of Roller Assembly.
   B. Replace Motor Clip.

2. A. Replace Idler Mounting Gudgeon on Idler End of Roller Assembly.
   B. Replace Quick Release Pin.

3. A. Replace Fascia.
   B. Replace screws on bottom of Headbox.
Section 8 - **Securing Guide Cable**

1. While capturing Hem Bar of shade, pull cable through Mounting Bracket, until crimped barrels are resting on Cable Mounting Hole on Endcap. *(Deck mount option shown).*

2. Replace Washer and Nut on the bottom bracket and tighten until desired tension is reached. *(Wall mount option shown.)*

Section 9 - **Hem Bar Liner Options**

Please Note: Liner is factory installed *(if ordered).*

Section 10 - **Anti-Insect Brush Seals Option**

1. Remove double-sided tape and apply to Side Channels.

2. Install brush seals on each Side Channel.
Section 11 - Cable Exit

The Exterior Motorized FlexShade® can be ordered with a cable exit pre-drilled in the top or back of the Headbox. If no cable exit is specified, the cable is routed down and out the fabric opening under the motor.

Please Note: Right hand motor is shown.
Section 12 - RF Remote Programming Instructions

Please Note: The motor ships with no programming. Follow these instructions to program unit to the desired transmitter.

1. **Select a transmitter channel to assign motor.** Hold UP and DOWN buttons until motor jogs, then release.
2. **Check motor direction.** To reverse motor direction, hold MY/STOP button for 5 seconds until motor jogs. Check direction again.
3. **Move motor to upper limit position.** Hold MY/STOP and DOWN buttons until motor moves down, then release. Use UP and DOWN buttons to move shade to correct lower limit and press MY/STOP.
4. **While motor is at lower limit, hold UP and MY/STOP buttons until motor moves up, then release.** The shade should move to upper limit and stop.
5. **Next, hold MY/STOP button until motor jogs.**
6. **Put motor into USER MODE by holding small programming button on the back of transmitter and waiting for motor to jog.**

**Setting an Intermediate Stop - Shade MUST BE in USER mode.**
1. Move shade to desired mid-point location and hold MY/STOP button until motor jogs.
2. To test, press the MY/STOP button when motor is standing still. The shade will move to that intermediate location.
3. To delete an intermediate stop, go to the intermediate stop and hold the MY/STOP button until motor jogs.

**Add a Channel - Shade MUST BE in USER mode.**
1. Select channel currently operating motor, then hold programming button until motor jogs.
2. Select new channel to add to motor, then hold programming button until motor jogs.
3. The motor should now work on both the old and new channel.

**Delete a Channel - Shade MUST BE in USER mode.**
1. Select channel operating motor desired, then hold programming button until motor jogs.
2. Select channel to remove, then hold programming button until motor jogs. Motor should now only work on channel kept from Step 1.

**Adjust Limits in User Mode**
1. Move motor to limit (upper or lower) to be changed. Shade must move to previously set limit and will stop automatically.
2. Hold UP and DOWN buttons until motor jogs.
3. Move motor to its new limit location and hold MY/STOP button until motor jogs.

**Reset Motor**
1. Disconnect for 3 seconds, reconnect for 10 seconds, disconnect for 3 seconds. Shade will roll.
2. Hold program button on remote and wait for 2 separate jogs. Motor is now reset.
Section 13 - Limit Switch Adjustments

**Sonesse® 120V Motor**

- **Caution:** Unit ships without limits. Limits will need to be set before the unit is operated. Always be prepared to shut off manually when new adjustment is being tested.

**Push Button Limits**

1. Fully depress both limit switch push buttons, then operate wall switch to make sure system works properly.
2. Raise shade to desired "UP" stop position.
3. Set upper limit by depressing proper (back) push button.
4. Lower shade to desired "DOWN" stop position.
5. Set lower limit by depressing proper (front) push button.

**Screw-Type Limits**

7. Operate shade to desired "down" stop position. Set limit by turning proper socket toward +" to lower limit, and "+" to raise it.
8. Operate shade to desired "up" stopping position. Set limit by turning proper screw toward "-" to raise limit, and "+" to lower it.

- **Caution:** DO NOT allow the hem bar to hit the upper roller or fascia. This will damage the unit.

**Please Note:** Each full rotation of the limit screw equals approximately \( \frac{5}{8} \) (16mm) of shade travel, which may require rotating the limit screw several times.

**Controls & System Overview**

**Sonesse® RTS 120VAC Motors**

- RTS MOTOR 120V
- Decora RTS Wireless Keypad
- Palio RF Remote
- 110-120V Line
- Dashed Wiring by Electrician

**Sonesse® 120VAC Motors**

- 120V MOTOR
- Control Switch
- Single Gang Box (by others)
- Dashed Wiring by Electrician

- **NOTE:** Test shade operation if shade direction does not correspond with the switch orientation, turn power back off and switch the red and black wires from the motor to the switch. Do not wire motors in parallel without written permission from Draper.

Sonesse® is a registered trademark of Somfy® Systems, Inc.

---

Section 14 - Complete Electrical Connection

Operates on 110-120V, 60 Hz. current. Shade is shipped with internal wiring complete and control switch (es) fully boxed, and supplied with a 6' (183cm) cable lead (standard). Longer lead can be substituted by removing two screws in motor end of roller, removing lead, plugging new lead in, and replacing screws. Wire to connect shade to switch (es) and switch (es) to power supply should be furnished by installer. Connections should be made in accordance with attached wiring diagram, and wiring should comply with national and local electrical codes.

- **DO NOT** wire motors in parallel without written permission from Draper.
- **All operating switches should be "off" before power is connected.**

Exterior Motorized FlexShade®
Section 15 - Dimensions: Front View

Side Cable Option

- Shade Width: 1 1/8" (30mm)
- Fabric Width: 2 1/4" (57mm)
- Hem Bar Length: 1 1/8" (30mm)
- Side Channel Length: 1 1/8" (41mm)

Wall Mounted Cable Guide option

Deck Mounted Cable Guide option, configured for Inside Mount. For Outside Mount installation, Cable Guide may be turned 90°.

Side Channel Option

- Shade Width: 1 1/8" (30mm)
- Fabric Width: 2 1/4" (57mm)
- Hem Bar Length: 1 1/8" (41mm)
- Side Channel Length: 1 1/8" (41mm)

Gap between Hem Bar & Side Channel
NOTE: Mounting brackets attach to surface with #10 Flat Head Screw.
**Side Channel**

- 1 5/8" (41mm)
- 3/4" (9.5mm)
- 3/4" (19mm)

**Hem Bar**

- 2" (51mm)
- 1" (25mm)

**Optional Channel Adaptors**

- C073.002
- C090.053
- C090.054
- C104.148
