KS-3—Three Position Key Switch *(Maintained)*

**USES:**
- The KS-3 replaces the standard single-station control switch for all products (screens, shades or projector lifts) where the directional functions (Up and Down) need to be combined with the security of a key switch.
- It is not intended for use with any other control.

**COMPATIBILITY:**
- The KS-3 is intended as the sole control station, and cannot be used as a multiple station control. It can, however, be used with the KS-1 power supply key switch, although having two key switches is redundant.
- It is not intended for use with any other control.

**CONTACTS:**
- Maintained action.

**RATING:**
- 600 Volts, UL recognized, CSA recognized.

**DESCRIPTION:**
- 3-position key operator.
- Cover plate is stainless steel.
- Four 6" wire leads: black, black, red and blue (2 commons, down and up).
- 2¾" x 4½" cover plate fits a single-gang box.

**PART NUMBER:**
- 121018
