Specifications

Equipment

FlexShade Panels: Fixed panels, for interior and exterior applications, to consist of aluminum framing, with open weave glare control fabrics splined in frame groove with vinyl spline. Fabrics available in a variety of openness configurations and colors, to be specified from manufacturer’s standard offering. Frames attach to glazing frames, either inside or ceiling/wall, with clips provided. Units for mounting on building exterior install in extruded slide tracks. Removable for cleaning and maintenance.

Framing: Extruded framing, to be min. of 3/4" x 3/8" x .019", or larger, at manufacturer’s discretion. Units exceeding 40" in length or width to have center cross brace. Finish available in mill finish aluminum, dark bronze, or white. Mounting clips heads will closely match frame finish. Heavy duty extruded track available for mounting on exterior of building. Mounting hardware by others.

Fabrics

Phifer SunScreen® Series SW1000: Woven vinyl–coated fiberglass screening. Approx. 23% open. It is noncombustible and will not rust, corrode, shrink, scratch or stain.

Downloadable 3-part specifications are available at www.draperinc.com.
